

# CHECK YOUR BLIND SPOTS

with Security & Privacy Risk Assessments

## ACCIDENTS HAPPEN.

-  **67%** of OCR HIPAA security fines in 2020 cite insufficient risk analysis<sup>1</sup>
-  **\$15.3m** in fines levied by OCR in 2019-2020<sup>2</sup>
-  **\$7.13m** is the average cost of a breach for healthcare entities<sup>3</sup>
-  **24%** of all breaches in 2020 were in healthcare (highest of all industries<sup>4</sup>)

## CHECK YOUR BLIND SPOTS

-  Risk assessments identify security & privacy risk blind spots
-  Self-assessments often miss critical risks
-  Validate controls assumptions with evidence to combat a false sense of security
-  Identify HIPAA compliance gaps before the regulators do
-  Perform technical penetration testing assessments to find vulnerabilities before the bad guys do
-  Scope your assessments to include anywhere that PHI resides; not just core systems

## CAUTION: CONSTRUCTION AHEAD

Recent court rulings on encryption are likely to cause OCR to focus more on risk analysis enforcement

New HIPAA safe harbors promote assessment and alignment with NIST CsF and HITRUST CSF

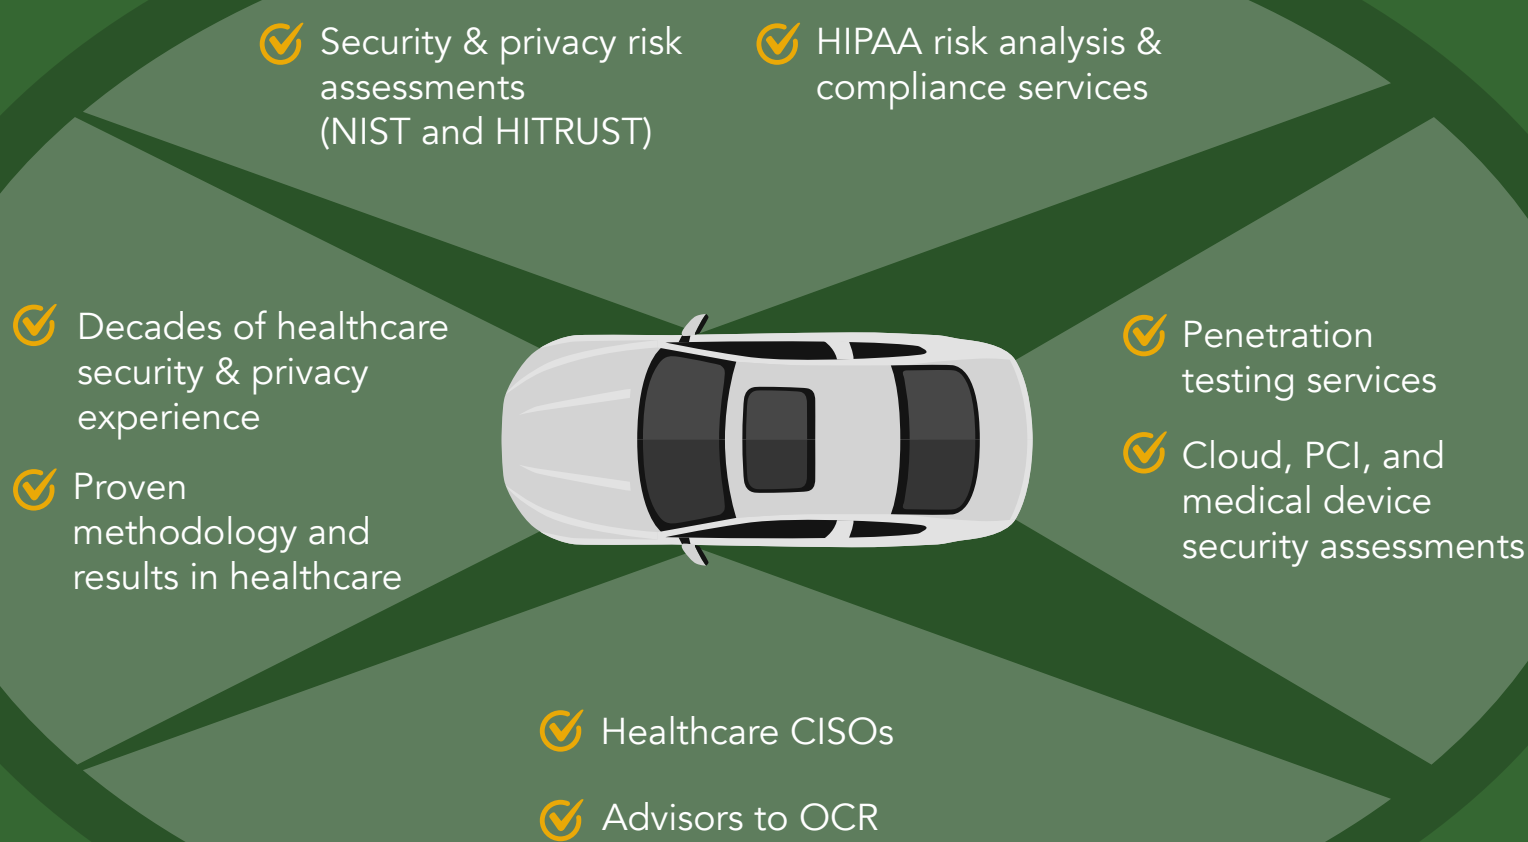

The HIPAA Privacy Rule has been overhauled; find out where you stand

State security and privacy regulations are evolving rapidly

## DRIVER-ASSISTANCE TECHNOLOGY FROM MEDITOLOGY

Ranked #1 Best in KLAS for Cybersecurity Advisory Services in 2019 and 2020, Meditology Services and Meditology Assurance are leading providers of information risk management, cybersecurity, privacy, and regulatory compliance consulting services, exclusively for healthcare organizations.
