

INTRODUCING HEALTHCARE'S

POWERFUL SECURITY RISK ENGINE

Meditology has unleashed a new generation of security risk management tracking and reporting automation designed specifically for healthcare.

MORE HORSEPOWER MEANS BETTER RISK OUTCOMES

STEP 1: MAKE RISK VISIBLE

GATHER DATA

Create process and tools to consistently consume varied data types

ORGANIZE DATA

Develop report templates and visualizations based on the stakeholder

STEP 2: FACILITATE WELL-INFORMED DECISION MAKING

FACILITATE THE DECISION

Provide a structured process and tools for decision making

CAPTURE THE DECISION

Develop data point templates for recording decision

COMMUNICATE THE DECISION

Establish communication mechanisms for right audiences

STEP 3: DRIVE ACCOUNTABILITY

TRACK DECISIONS & MILESTONES

Create mechanism for tracking

VALIDATE & REPORT RESULTS

Re-evaluate residual risk and communicate results

MEDITOLOGY'S POWERFUL RISK ENGINE

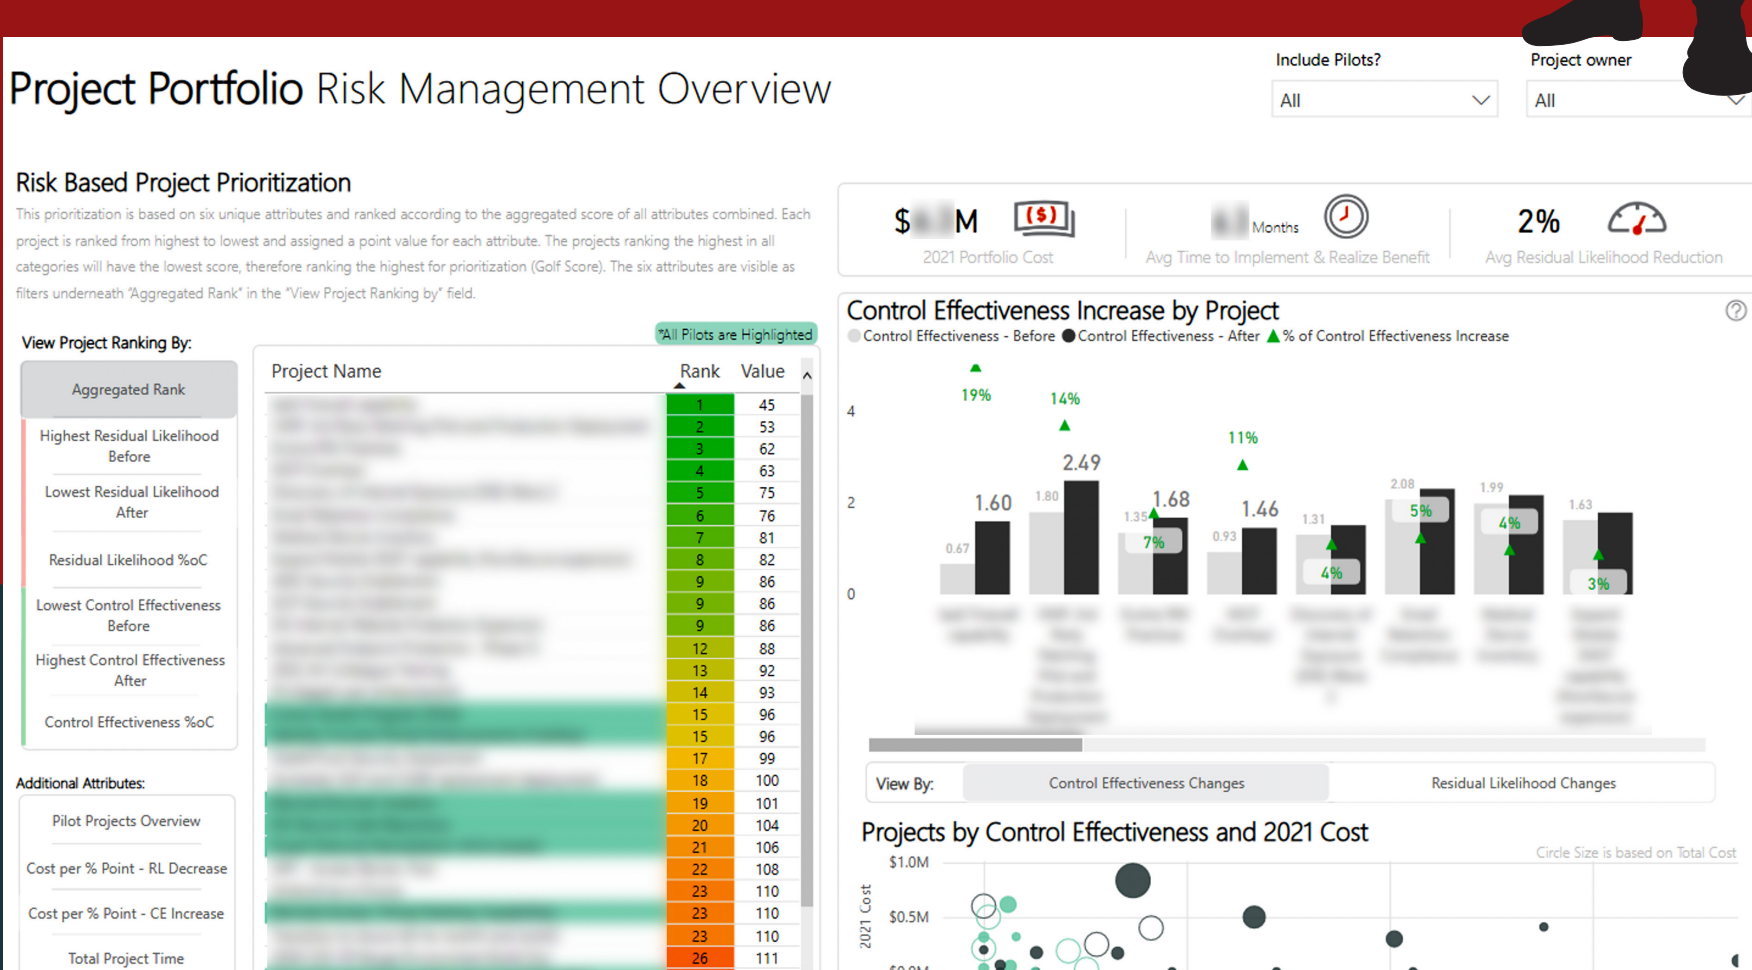

Built by and for healthcare security risk management programs

Communicates risk information in terms that the business can understand

Automated risk data collection and reporting

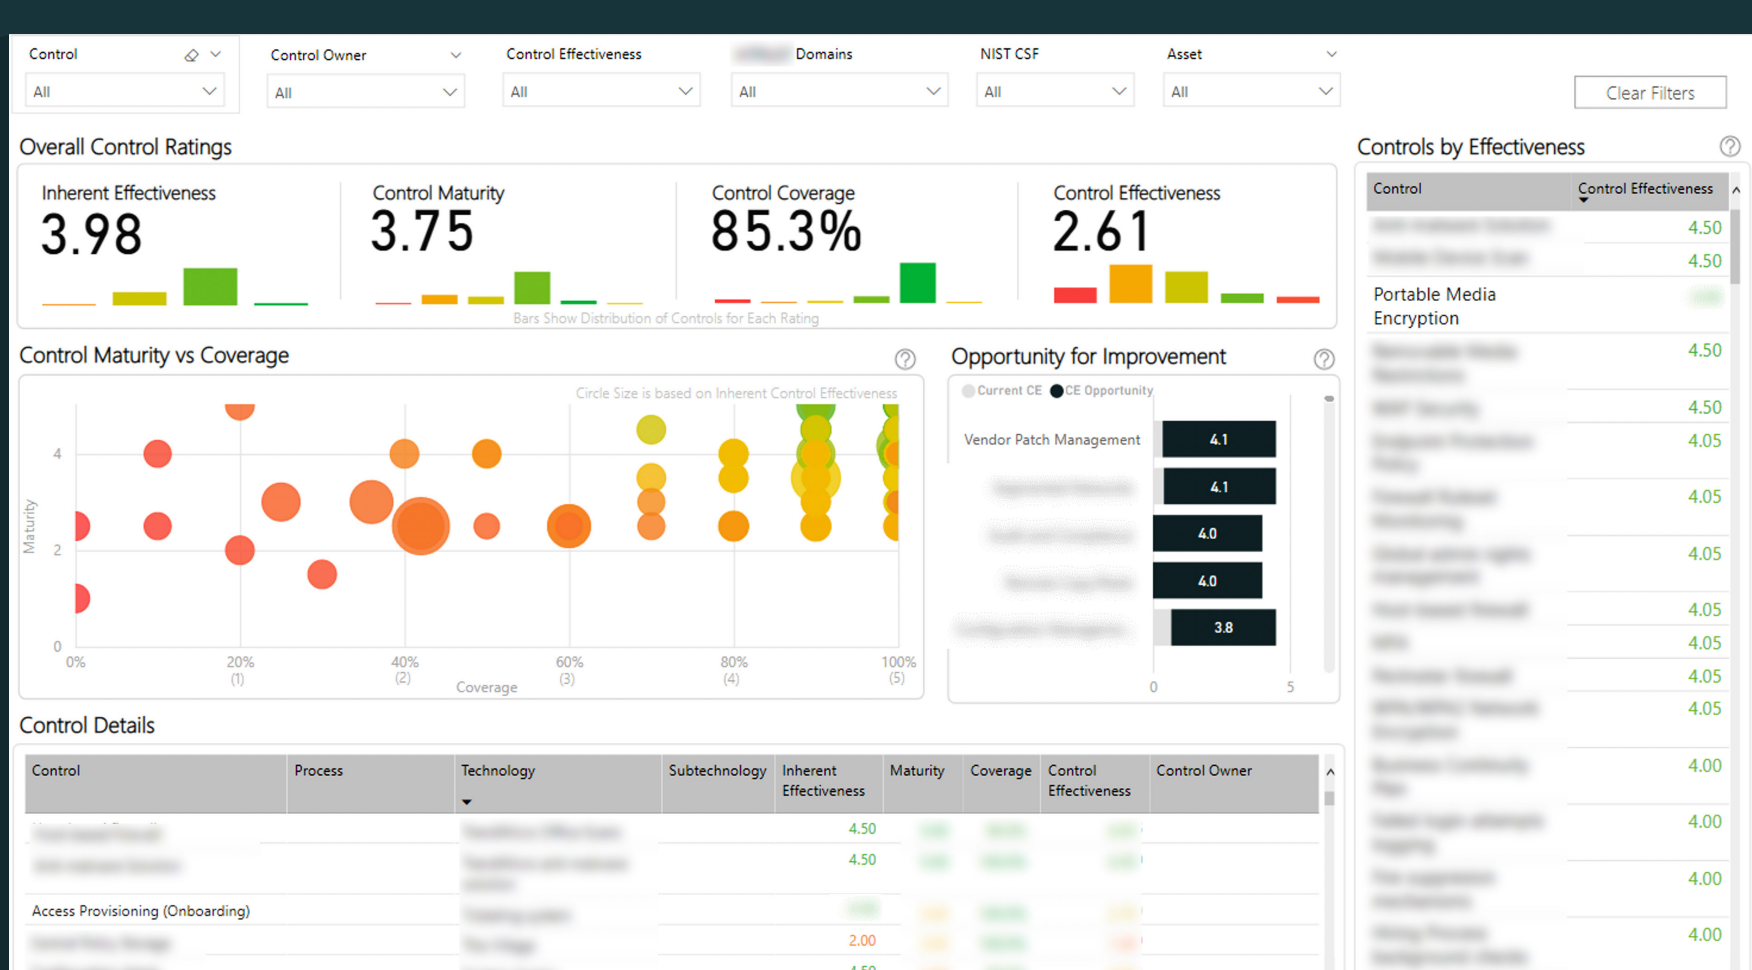

Aligned with industry standard risk reporting and security controls models including FAIR, ISO, NIST, COBIT, and CVSS

Quantifies risks and remediation in dollars and cents terms

Leverages Business Intelligence (BI) reporting and GRC capabilities and automation to capture and report metrics in a consistent, repeatable, and scalable manner

Tailored to your organization's specific technical, cultural, and communication requirements

Provides compliance reporting for HIPAA, OCR, and other regulatory objectives

Gathers and organizes data that provides a clear picture of risk tailored to target stakeholder groups
